

SETTING UP YOUR TELE-FORENSIC INTERVIEW ROOMS

Need help? Call the TFI-setup hotline at:
443-934-4396

A webcam with built in microphone is needed for the interviewee AND a backup for the interviewer in case the interviewer's built in webcam malfunctions

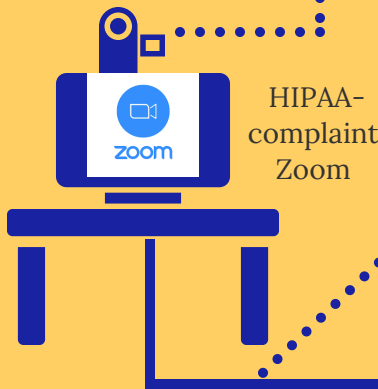

Logitech HD Pro Webcam with built in microphone

For younger children, consider mounting a webcam on the wall, rather than having a smaller webcam on the computer

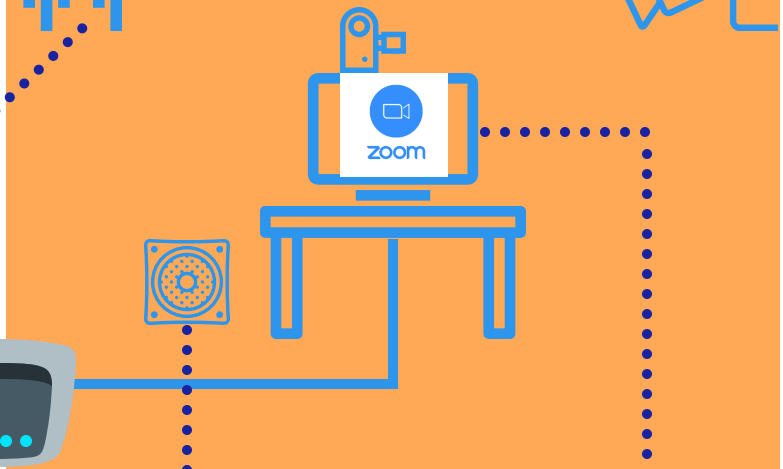

Logitech Conferencecam All-In-One

Interviewer Room

HIPAA-complaint Zoom

Interviewee Room

EACH room should have some kind of backup recording

Olympus WS-853 Digital Voice Recorder

25-foot ethernet cable

BOTH computers should be directly connected to a wireless router via ethernet

Include a speaker because most built-in computer speakers have poor sound quality

Sony SRS-XB22 Portable Speaker

25-foot HDMI cable

For less distraction, you may want to have only a monitor in the room. Run a extended HDMI cord to a computer in a different room
